

The Chinese embassy asked the Chinese embassy or Philippine embassy or home country government, who is the victim of the accusation stated in the accusation letter, the support, but from the Chinese embassy, "The Chinese government said nothing to the Japanese government There is no answer.

Japan has long been a weak country against external pressure. When it is said from developed countries such as the United States, it is a nation that responds as if there was something wrong, as if nothing had happened.

We are seeking support from the US government, G7 governments, the Russian government and others.

To everyone in the world such as a newspaper publishing company, we send it as requested email every week, so as to condemn the Japanese government as an article. The Office of the High Commissioner for the United Nations as a foreign pressure as well, please urge the Japanese government to "govern under the law, respect the fundamental human rights, comply with international law".

However, when using the trial system for requesting retrial, there is not much time because the prescription of 'special officials' abuse of the authority of official authority' and 'false complaint' is seven years (incident occurrence is June 2010). Please respond in an emergency.

If the prescription of a criminal case is over, please recommend the relief by legislating the special law to the Japanese government.

I will file a complaint against himself, although I am the "assistant assistant criminal case aid case", but also the Chinese and the Filipino who submit a letter of accusation also ask for relief.

Because the incidents of violation of immigration law are occurring frequently, in addition to Chinese and Philippine people, countless foreigners are being punished contrary to international law, so please also recommend this recommendation .

The purpose of "request for retrial" is to seek compensation for apology and recovery of honor (innocence), and loss of economic and mental loss.
